YOUR Health is OUR Health.

The U.S. is in the midst of an epidemic of opiate addiction and overdose. Overdose deaths from prescription painkillers have quadrupled since 1999. Deaths from heroin have tripled in the last five years. Pennsylvania has a higher overdose rate than most states. We are committed to helping combat this problem and helping you.

Here in Pennsylvania, the Commonwealth Prevention Alliance (CPA) has created an online resource called **PAStop.org** with information about the risks of opiate use and what to do when you need help.

We believe that all of our employees should be familiar with this information.

Please visit: **pastop.org/get-information**

Opiate addiction affects men and women of all ages, races, and geographic locations. Anyone can become addicted. Anyone. If you or a loved one is at risk for addiction or in need of immediate help, please contact:

Anyone Can Become Addicted. Anyone.
